## Professional Profile

---

Junior **front end web developer** with experience with **HTML, CSS and JavaScript**. **Diploma qualified in Information Technology** with a passion for delivering the best end user experience and well-documented code while improving my skills. Motivated and open-minded, adapts to various environments.

Transitioning into a career in Web Development

## Programming Skills

---

- HTML5
- CSS3
- JavaScript
- jQuery
- React
- GitHub
- Bootstrap
- APIs
- User experience design
- DOM manipulation
- Git

## Web Development Projects

---

- Co-created an e-commerce website to sell make-up products. The technologies used were **React, HTML, CSS, JavaScript, React Bootstrap, hooks and React Icons**. In charge of creating the wireframe of the website, the navbar, the logo, fetching the data from an **API** of make-up products and adding it to the products page. The website was deployed using Netlify.  
**Link to the website:** <https://ecom-react-app-makeup-junkie.netlify.app/>
- City Guide was used for the user to search for any city and get a summary of it, the current weather, the currency and the public holidays. Responsible for calling the currency exchange API with Ajax and showing the currency with user input, and of adding the latest cities searched to local storage. Successfully delivered the project on time of the deadline.
- Some of the projects created independently are a README generator using node, a team profile generator using node and JavaScript, weather forecast with local storage and API.  
**Link to GitHub with all the projects:** <https://github.com/PurAlex>
